

OBJECTIVE

Computer Science undergraduate seeking to join the Apple Developer Academy to deepen iOS development skills, build human-centered products, and contribute to a collaborative team driven by craft and innovation.

SKILLS

Programming

Python, JavaScript, PHP, C++, Java, SQL

Frameworks

FastAPI, React Native, Express.js, Flutter, TailwindCSS

Tools & Infra

Git/GitHub, Linux, VPS, REST APIs, Redis, MQTT, IoT Hardware

Creative

Adobe Premiere Pro, Photoshop, Videography, Graphic Design

LANGUAGES

Bahasa Indonesia — Native

English — Advanced (TOEFL ITP 557, IELTS Prep Band 7)

CERTIFICATIONS

BNSP Junior Web Programmer — Nov 2025

HERTECH, ICT Watch — Nov 2025

Python for Data Science & ML Bootcamp, Udemy — Apr 2026

GEMASTIK XVIII 2025, Data Mining — Oct 2025

IELTS Preparation, Score 7 — Jun 2024

TOEFL ITP, Score 557 — Dec 2022

EXPERIENCE

Information Technology & Digital Intern

PLN Indonesia Power — Head Office • Jan 2026 – Feb 2026

- Engineered an automated Bun.js + Playwright scraper for the Sungrow iSolarCloud platform, eliminating manual portal checks with a real-time internal dashboard.
- Built REST APIs and integrated Redis caching to manage real-time data pipelines without overloading source servers.

Documentation Division Staff

PKKMB UPN VY • Jul 2025 – Aug 2025

- Documented campus-wide events and Faculty of Industrial Engineering activities through photography and video.

Videographer

Multimedia Community Informatika • Oct 2024 – Present

- Produced and edited multimedia content for the Informatics community, operating professional-level video equipment.

EDUCATION

Bachelor of Computer Science (Informatics)

Universitas Pembangunan Nasional Veteran Yogyakarta • Aug 2023 – Present (GPA 3.67)

- Active member, Multimedia Community Informatika; pursuing personal projects in data science and full-stack development.

Science (MIPA) Stream

SMA Internasional Budi Mulia Dua • Jun 2020 – May 2023 (Grade 88)

- 1st Runner-Up, National Robotic Competition — Institut Teknologi Sepuluh Nopember (2022)
- Gold Medal, Indonesian Student English Olympiad — Student Olympiad Center (2022)

PROJECTS

FinApp Mobile — AI-Powered Stock Market Analysis

AI Integration & Backend Logic Engineer • Group Project

- Engineered the core analytical engine integrating the OpenRouter LLM API with a Fuzzy AHP + TOPSIS (MCDA) algorithm to convert user preferences into data-driven Buy/Hold/Sell decisions.

EventSync — Cloud-Based Event Organizer Platform

Mobile Developer • Group Project

- Built the entire cross-platform Flutter application from scratch, consuming a dual-database backend via JWT-secured REST APIs for real-time chats, tasks, rundowns, and vendor management.

CipherDrop — Secure E2EE Messaging & File Sharing

Backend & Security Engineer • Group Project

- Developed a Python/FastAPI backend deployed on a VPS implementing AES-256-GCM and Vigenère super-encryption, keeping the server blind to plaintext messages and passphrases.
